

VCP19 Technical Report erratum

18 February 2020

Chapter, section, page etc.	Current	Corrected (altered text in bold)
Section 5.3.3, Figure 36	Projected change in annual rainfall (%) for each of the six VCP19 CCAM simulations between 1986–2005 and four 20-year future periods centred on 2030, 2050, 2070 and 2090 (models are downscaled using CCAM and are labelled using the name of the GCM used as input).	Projected change in annual rainfall (%) under high emissions (RCP8.5) for each of the six VCP19 CCAM simulations between 1986–2005 and four 20-year future periods centred on 2030, 2050, 2070 and 2090 (models are downscaled using CCAM and are labelled using the name of the GCM used as input).
Section 5.8 Fire weather, p.66, Figure 50	Caption reads: "... 1980-1989"	" ... 1980-1999"
Section 6.1.1, Figure 56	Y-axis reads: "Mean annual temperature (°C)"	"Mean annual temperature anomaly (°C)"
Section 6.1.1, Figure 56	Caption reads: "Victorian average annual temperature in 11 simulations under the BRACE program where global mean temperature plateaus at +2°C from the pre-industrial era (blue is historical, red is projected, dark lines are the average off 11 simulations) and ACORN-SAT-v2 (black)"	"Victorian average annual temperature anomaly (relative to 1920-1940) in 11 simulations under the BRACE program where global mean temperature plateaus at +2°C from the pre-industrial era (blue is historical, red is projected, dark lines are the average off 11 simulations) and ACORN-SAT-v2 (black)"
